

Recycling Systems Based on Local-Production for Local-Consumption

Proprietary Teijin Group technology enables integrated product creation starting from collection.

Resource-Efficient Use and Waste Minimization

To promote resources recycling and reduce waste, the Teijin Group has set a target of improving the landfill waste volume per sales unit by 10% by FY2030 compared to FY2018. To preserve water resources, we are also expanding products with low water usage to achieve a target of reducing freshwater intake volume per sales unit by 30% by FY2030 compared to FY2018.
