3. Our steps to ensure that slavery and human trafficking is not taking place

Human rights due diligence

In FY 2018, the Teijin Group has conducted a survey with the support of an external NGO in order to sort out the types of human rights issues that could be considered for each our business, and to identify places where such issues might become apparent. The businesses targeted by this survey is a total of 11 businesses: aramid, carbon fibers, resin, film, composites, fibers and products converting, pharmaceuticals, home healthcare, IT, material new business and healthcare new business. As a specific survey method, we quantitatively analyzed the human rights issues risk in each of the above 11 businesses, from the two perspectives of “country / region” and “business contents”, based on the characteristic of each of the above 11 businesses (country / region and business contents etc.) and the characteristic of our suppliers of each businesses (place of operation, materials of their products and business contents etc.). Through this survey, we have confirmed that in the business of fibers and products converting, human rights
issues are most likely to take place, particularly in the countries of Myanmar, China, Vietnam and Thailand. In the business of fibers and products converting, we have already promoted efforts to respect human rights, but we will continue to promote improvement as a high priority business.

**CSR procurement**

The Teijin Group conducts the following activities for CSR procurement in cooperation with our suppliers.

- **Teijin Group supplier surveys**

We have developed and launched an original system for surveying and rating our supplier’s status of efforts on CSR. The system utilizes an online questionnaire to confirm whether or not suppliers are complying with the Teijin Group CSR Procurement Guidelines, and the results are used to determine their place in a 5-level ranking system. We are conducting these supplier surveys not only of major suppliers in purchasing divisions in Japan but also of major suppliers of the general affairs and human resources department and overseas Teijin Group companies. Based on the results of these surveys, in FY2018, we have conducted detailed interviews, alerted and/or requested submission of an improvement plans to 28 companies in Japan and overseas.

In FY2018, Teijin Frontier has prepared a new Chinese version of the Standards for Sustainable Procurement, in addition to English and Japanese versions, and additionally sent its Standards for Sustainable Procurement to about 1,000 suppliers including Japanese, English and Chinese versions. In addition, based on the results of the above Teijin Group supplier surveys, Teijin Frontier requests its suppliers to cooperate in on-site-survey, and in FY2018, Teijin Frontier has actually visited 28 sewing factories etc. in Japan and overseas and conducted actual condition surveys.
